Transmittal No. 02-21

TAIWAN – Air Traffic Control Radar

On 4 June, the Defense Security Cooperation Agency notified Congress of a possible Foreign Military Sale to Taiwan of AN/MPN-14 Air Traffic Control radars and associated equipment and services. The total value, if all options are exercised, could be as high as \$108 Million.

The Taipei Economic and Cultural Representative Office in the United States has requested a possible sale of three (3) AN/MPN-14(SS) radar sets, spare and repair parts, support and test equipment, radar modification kits, publications and technical documents, U.S. Government and contractor technical assistance, and other related elements of logistics support. The estimated cost is \$108 million.

This sale is consistent with United States law and policy as expressed in Public Law 96-8.

The proposed sale of radar sets will provide the recipient air traffic control (specifically, radar approach control) capabilities in and around their military's airfields. The recipient will have no difficulty absorbing these radar sets into its armed forces.

The proposed sale of this equipment and support will not affect the basic military balance in the region.

The prime contractor will be ITT Industries of Van Nuys, California. There are no offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will not require the assignment of any additional U.S. Government or contractor representatives to recipient.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

This notice of a potential sale is required by law; it does not mean that the sale has been concluded.
